

ABSTRACT OF THE DISCLOSURE

A multi-modal text editing correction environment is disclosed. An application
5 program owns a document, while each of a number of handlers has a corresponding input
device and is capable of entering text into the document. Each handler has a method
callable by the program to request: that the handler return correction content for display
by the application; and/or that the handler display a correction interface. A common text
framework includes a mechanism to track entry of text into the document by handler, and
10 a correction interface callable by the application program to determine the handler
responsible for entering a particular range of text into the document.

I hereby certify that this is being deposited with the United States
Postal Service "Express Mail Post Office to addressee" service
under 37 CFR § 1.10 in an envelope addressed to The Assistant
Commissioner for Patents, Washington, DC 20231, on Apr 25,
2000, by Michael Dryja, and having "express mail" mailing label no.
EJ243665034US.
